

Center for Supercomputing Applications at the University of Illinois.

As a brief aside, I was just at the NCSA in Urbana-Champaign at the University of Illinois for the launch of the Blue Waters supercomputer, one of the most powerful supercomputers in the world, which is also there at the University of Illinois. But Marc Andreessen, one of the lead programmers on the original project that created Mosaic and the founder of Netscape, summed up the importance of Federal investment in this research by saying:

If it had been left to private industry, it wouldn't have happened, at least, not until years later.

Innovative breakthroughs like the Mosaic Web browser changed our everyday lives and established the United States as the world leader in networking and information technologies, and the Federal Government played an important role in that. But today we find ourselves in a world in which we can no longer take U.S. supremacy for granted. As we heard during committee consideration of the bill, China, Japan, Germany, and several other countries are increasing their investments in NIT R&D as well as their capacity to convert R&D into new commercial technologies. We must prioritize cutting-edge, large-scale R&D and effective technology transfer policies, focused on the most advanced areas of network and information technology, in order to preserve our lead in these sectors.

H.R. 967, the Advancing America's Network and Information Technology Research and Development Act, achieves these ends through the development of a coordinated Federal R&D investment strategy. This bill requires Federal agencies involved in the R&D program to develop 5-year plans specifying near- and long-term objectives and to assess and evaluate progress periodically to ensure we maintain U.S. leadership in these fields.

Mr. Speaker, this legislation will focus our scientific community towards the innovative, large-scale, and collaborative R&D we need to remain a leader in networking and information technologies. This is a good, bipartisan bill, and I urge my colleagues to support it.

Mr. SMITH of Texas. Mr. Speaker, I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I am very supportive of the bill, and I yield back the balance of my time.

Mr. SMITH of Texas. Mr. Speaker, I yield back the balance of my time as well.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. SMITH) that the House suspend the rules and pass the bill, H.R. 967, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. SMITH of Texas. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 1163, by the yeas and nays;

H.R. 756, by the yeas and nays;

H.R. 967, by the yeas and nays.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

FEDERAL INFORMATION SECURITY AMENDMENTS ACT OF 2013

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and pass the bill (H.R. 1163) to amend chapter 35 of title 44, United States Code, to revise requirements relating to Federal information security, and for other purposes, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. ISSA) that the House suspend the rules and pass the bill.

The vote was taken by electronic device, and there were—yeas 416, nays 0, not voting 16, as follows:

[Roll No. 106]
